CARRIER ILLUSTRATIONS

Advisors ask once. Software prepares the three-carrier comparison.

To compare carriers for a client, an advisor runs each carrier's illustration tool separately and assembles the results by hand. We propose software that does that work and hands back a finished comparison, built from the carriers' own documents.

HOW IT WOULD WORK

1 Request
The advisor picks the client, the type of policy and the amount.

2 Carrier tools
Software fills in each carrier's tool and saves the carrier's document.

3 Check
Each document is compared with the request. Mismatches go to staff.

4 Comparison
The advisor receives it with the carrier documents, and reviews it.

WHAT THE ADVISOR WOULD RECEIVE

Tompkins Insurance — Carrier comparison · $10,000,000 permanent coverage · Male, 52

	CANADA LIFE	MANULIFE	SUN LIFE
Annual premium, 20 years	$468,200	**$455,900**	$479,600
Cash value, year 20	$13.27M	$12.62M	**$13.32M**
Death benefit, age 85	$23.73M	**$26.83M**	$24.46M
Return on premiums, age 85	3.93%	**4.55%**	3.95%

Layout example only. These figures are invented and did not come from the carriers.

WHAT CHANGES FOR AN ADVISOR

TODAY, AS WE UNDERSTAND IT	WITH THIS
• Signs in to three carrier tools	• Makes one request
• Types the same client three times	• Types the client once
• Builds the comparison by hand	• Reviews a finished comparison

WHERE IT STANDS

Not built. Not yet tested.

KNOWN TO WORK

- ✓ Software filling in a website and saving the PDF
- ✓ Reading figures out of a PDF
- ✓ Building the branded comparison

NOT YET KNOWN

- ? Whether each carrier's tool can be run this way
- ? How long a run takes
- ? Whether sign-in still needs a person
- ? How much upkeep it needs

THE MAIN RISK

Carrier rules generally do not allow software to operate their tools. Each carrier would have to agree. If one says no, staff run that carrier's tool and the software still builds the comparison.

DECISION NEEDED

Approve a test with one carrier.

One advisor, one real case, to see if it works before anything is built. Plus approval to ask the carriers.
